Introduction

Enhanced Data Information

This guide provides an overview of the United States With Enhanced Address (USE) Additional Dataset.

This data contains additional addresses which are not included in the USA Address data.

For general information about the United States (USA Address) data, see the *United States Data Guide*. For information about the Names Additional Dataset, see the *United States With Names Additional Data Guide*.

You must have the USA Address Dataset installed to use the USE Additional Dataset.

USA Enhanced Address Additional Dataset

Dataset Code:	USE
Approximate Data Size:	Pro: 2.0GB Pro Web: 2.0GB
Data Source:	All data, extracts and updates © Experian
Update Frequency:	Bi-monthly
Expiry:	The data release dates are: <ul style="list-style-type: none">• January• March• May• July• September• November Data files will expire approximately 120 days after the data release date. Ensure every data update is applied promptly, otherwise the data may expire and the product will become unusable.

This dataset can only be used with Pro V5.03 (or above) and Pro Web V5.20 (or above).

About This Data

Area Covered

The United States datasets cover all postal addresses within the United States and its territories, including US military posts abroad.

About DataPlus

Pro and Pro Web can be configured to return additional information alongside an address, in the form of DataPlus sets. The following DataPlus sets are currently available for USE Enhanced Addresses data:

- USE Address Type Indicator

Please refer to the relevant section of the product documentation for information on configuring Experian products to return DataPlus information.

USE Address Type Indicator

The USE Address Type Indicator DataPlus set is available for Pro and Pro Web products only.

Identifier: USAEAT

Items:	Code:	Description:	
Address Type Indicator	AddrTp	R	Residential
		B	Business
		M	Mixed
		U	Unknown
		Null	No information is available
Cottage Indicator	Cottg	Y	Yes
		Null	No information is available

This DataPlus set returns an address type indicator for a specific address which enables you to categorize your outgoing mail as residential, business, or mixed. This categorization will enable you to choose the cheapest shipping method for your needs.

For example, some shipping firms add a surcharge to mail destined for residential addresses, whereas the USPS does not

Using This Data

This section provides search tips and other product-specific information when using USE Enhanced Address data. This data works with Pro and Pro Web in the same way as USA Address data. For search tips and examples, see the *United States Address Data Guide*.

Please refer to the relevant product manuals for more detailed information on using Experian products.

These searches are accurate at the time of data release. However, search results may differ depending on the data release you are using.

With Pro

Search Examples: Typedown And Single Line

For information about the best methods for searching on the United States Enhanced Address data using Typedown and Single Line searching, please refer to the "Using This Data" section in the *United States Address Data Guide*.

With Pro Web

Scenarios

Scenario	Search engine	For search examples, see:
Address Capture	Single Line flattened	Pro Single Line search examples in the <i>United States Data Guide</i> .
Address Verification	Verification	Verification search examples in the <i>United States Data Guide</i> .
Single Line	Single Line hierarchical	Pro Single Line search examples in the <i>United States Data Guide</i> .
Standard	Typedown Single Line hierarchical	Pro Typedown and Single Line search examples in the <i>United States Data Guide</i> .

Search Examples: Verification

Users of Pro Web can use address verification functionality to verify a customer's address once they have typed it in full into a web form.

For a list of example searches and the Verify level they return, please refer to the "Using This Data" section in the *United States Address Data Guide*.

For more information about the Verification engine, refer to the Address Verification section of the *Pro Web Integration Guide*.
